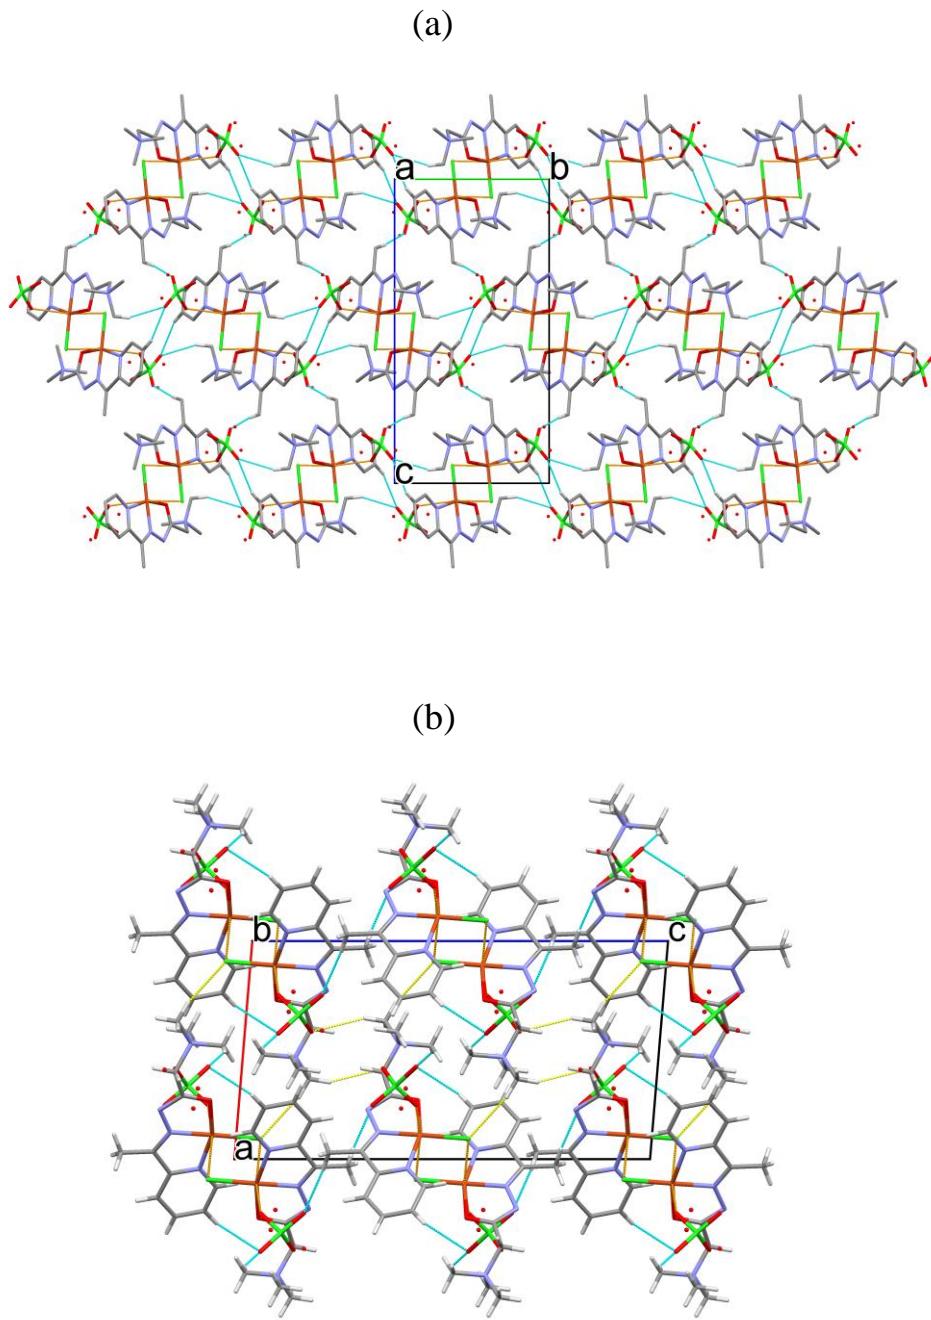

Fig. S1. Packing diagram of **1**: (a) A view of (100) layer showing centrosymmetric dimeric units $[\text{Cu}_2\text{L}_2\text{Cl}_2](\text{ClO}_4)_2$ connected by means of C-H...O hydrogen bonds (dashed blue lines). Long contacts $\text{Cu}\cdots\text{O}_{\text{perchlorate}}$ and $\text{Cu}\cdots\text{Cl}$ are represented as dashed orange lines. Hydrogen atoms have been omitted for the sake of clarity, except those involved in hydrogen bonding. (b) Side view of (100) layers showing intermolecular $\text{C}_{\text{Me}}\text{-H}\cdots\text{Cl}$ and $\text{C}_{\text{Me}}\text{-H}\cdots\text{O}_{\text{perchlorate}}$ hydrogen bonds (dashed yellow lines) operating between neighboring layers.

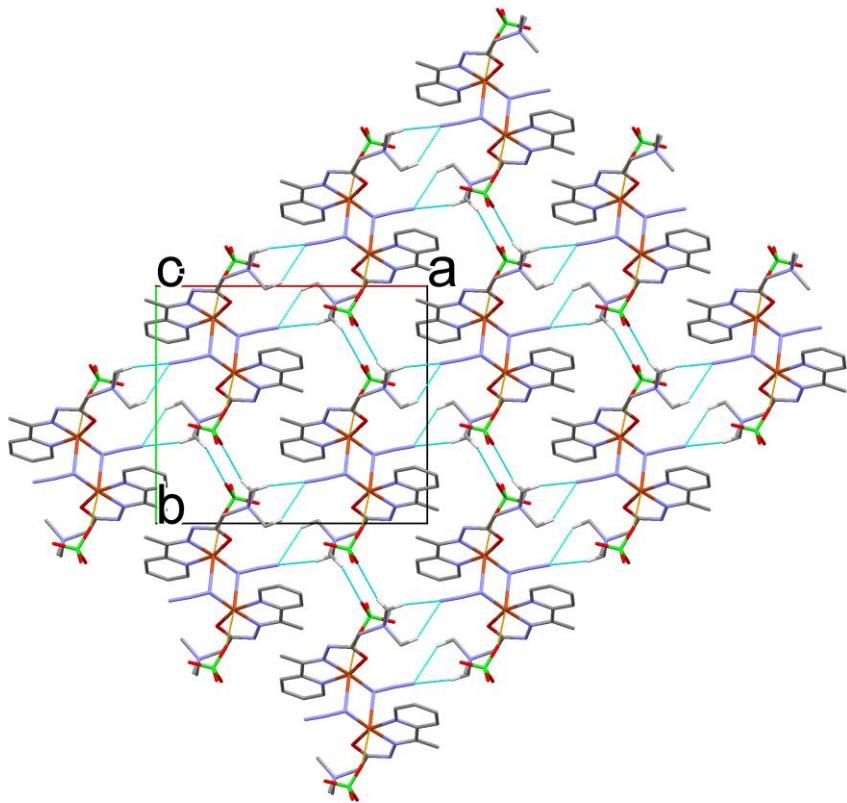

Fig. S2. Crystal packing of **2** showing dinuclear units $[\text{Cu}_2\text{L}_2(\text{N}_3)_2]^{2+}$ connected by intermolecular $\text{C}_{\text{Me}}\text{-H}\cdots\text{N}_{\text{azide}}$ hydrogen bonds into 1D chains extending parallel with the $[1 -1 0]$ direction. The perchlorate anions are involved in the intermolecular $\text{C-H}\cdots\text{O}$ hydrogen bonding and form long non-bonding contacts (represented as dashed orange lines) with $\text{Cu}(\text{II})$ ions. ~~from the neighboring chains~~ Hydrogen atoms have been omitted for the sake of clarity, except those involved in hydrogen bonding.

Table S2

Influence of the exchange-correlation functional and basis set on the calculated exchange coupling constant J (cm^{-1}).

		BP86	OLYP	OPBE	PW91	B3LYP	B3LYP*	TPSSH
$[\text{Cu}_2\mathbf{L}_2(\text{N}_3)_2]^{2+}$	def2-tzvp	5.36	4.75	5.61	5.22	3.58	3.55	2.06
	def2-tzvpp	5.91	4.74	5.32	5.82	3.81	2.67	1.74
