

10th INTERNATIONAL SCIENTIFIC CONFERENCE
ON DEFENSIVE TECHNOLOGIES

OTEH 2022

Belgrade, 13-14, October 2022

Rudjer Boskovic

(1711 – 1787)

He has left an indelible imprint in mathematics, astronomy, physics, optics, geodesy, architecture, archeology, pedagogy, philosophy, literature and diplomacy.

PREFACE

Military Technical Institute, the first and the largest military scientific-research institution in the Republic of Serbia with over 70 years long tradition, has been traditionally organizing the OTEH scientific conference, devoted to defense technologies. The Conference is supported by the Ministry of Defense and it takes place every second year.

Its aim is to gather scientists and engineers, researchers and designers, manufactures and university professors in order to exchange ideas and to develop new relationships.

The 10th International Scientific Conference OTEH 2022 is scheduled as follows: lecture on the occasion of “Rudjer Boskovic”, given by Prof. Slobodan Ninkovic, PhD, and two plenary lectures: “Artificial Intelligence in Function of Developing Innovation Products“, given by Prof. Miljan Vucetic, PhD Eng, and “High Performance Multi-functional Panels for Extreme Loading Events“ given by prof. Constança Rigueiro, PhD , as well as working sessions according to the Conference topics.

The papers which will be presented at the Conference have been classified into the following topics:

- Aerodynamics and Flight Dynamics
- Aircraft
- Weapon Systems and Combat Vehicles
- Ammunition and Energetic Materials
- Integrated Sensor Systems and Robotic Systems
- Telecommunication and Information Systems
- Materials and Technologies
- Quality, Standardization, Metrology, Maintenance and Exploitation.

The Proceedings contain 103 reviewed papers which have been submitted by the authors from 13 different countries. I would also like to emphasize that we have 14 papers with authors from abroad. The quality of papers accepted for publication achieved very high standard. I expect stimulated discussion on many topics that will be presented online, during two days of the Conference.

On behalf of the organizer I would like to thank all the authors and participants from abroad, as well as from Serbia, for their contribution and efforts which made this Conference possible and successful.

I would also like to thank the Ministry of Education, Science and Technological Development of the Republic of Serbia for its financial support.

Finally, dear guests and participants of the Conference, I would like to wish you a pleasant and successful work during the Conference. I am looking forward to see you again at the tenth Conference in Belgrade. All the best and stay healthy.

Belgrade, October, 2022

Col. Miodrag Lisov PhD Eng
President of the Scientific Committee
OTEH 2022

CONTENTS

PLENARY LECTURES

ARTIFICIAL INTELLIGENCE IN FUNCTION OF DEVELOPING INNOVATION PRODUCTS, Miljan Vucetic, PhD, Vlatcom Institute of High Technologies/Singidunum University, Belgrade, Serbia

- XII **HIGH PERFORMANCE MULTI-FUNCTIONAL PANELS FOR EXTREME LOADING EVENTS**, Constança Rigueiro, PhD, Polytechnic Institute of Castelo Branco, Institute for Sustainability and Innovation in Structural Engineering, castelo Branco, Portugal

1. SECTION : AERODYNAMICS AND FLIGHT DYNAMICS - AFD

- 2 **MEASUREMENT OF HOVER PERFORMANCES FOR MINI UNMANNED AIRCRAFT VEHICLE**, Marija Samardžić, Lazar Petrović, Uros Ivković, Snežana Zurovac
- 8 **PREDICTION OF QUASI-STEADY FLUTTER VELOCITIES OF TAPERED COMPOSITE PLATES AT LOW MACH NUMBERS: ANALYSIS AND EXPERIMENT**, Mirko Dinulović, Aleksa Maljević, Branimir Krstić
- 13 **ON THE USE OF HIGH PITCH SWEEP RATES IN TIME-LIMITED SUPERSONIC WIND TUNNEL TESTS**, Dijana Damljanović, Đorđe Vuković, Biljana Ilić, Goran Ocokoljić, Stefan Krstić
- 19 **NUMERICAL ANALYSIS OF A PROPELLER IN GROUND EFFECT**, Jelena Svorcan, Aleksandar Kovačević, Toni Ivanov, Aleksandar Simonović
- 25 **NUMERICAL INVESTIGATION OF WING STRAKES AERODYNAMIC INFLUENCE USING MODIFIED SDM MODELS**, Jelena Šobot, Ivan Kostić, Olivera Kostić, Marija Samardžić
- 30 **VORTEX INDUCED DOWNWASH EFFECT ON STATIC STABILITY OF SUBSONIC AIR TO SURFACE MISSILE**, Ivan Marić, Anja Gavrilović, Ilija Nenadić, Goran Ocokoljić

2. SECTION : AIRCRAFT - A

- 37 **BUILDING OF PROBABILISTIC-STATISTICAL MODEL OF ENGINE FAILURES**, Olga Filippenko, Dana Belskaya, Volha Poletayeva
- 41 **STRENGTH CALCULATION OF LATERALZ LOADED TWO DIMENSIONAL PLANE STRUCTURAL ELEMENT**, Bogdan Bogdanović, Tonko Mihovilović
- 46 **LANDING GEAR BRAKES TESTING**, Teodor Babić, Marina Ostojić, Tamara Nikolić, Nikola Bogavac
- 50 **POWERPLANT COOLING FLIGHT TESTS**, Marina Ostojić, Tamara Nikolić, Nikola Bogavac
- 55 **TOTAL FATIGUE LIFE ESTIMATION OF AIRCRAFT STRUCTURAL COMPONENTS USING STRAIN ENERGY DENSITY METHOD**, Stevan Maksimović, Katarina Maksimović, Ivana Vasović Maksimović, Mirjana Đurić, Mirko Maksimović
- 61 **TESTING OF AAD FOR RESERVE PARACHUTE CANOPIES**, Stevan Jovičić, Jelena Šobot, Ljubiša Tomić, Ivo Obradović
- 66 **OPTIMIYING THE CROSS-SECTION OF ELASTIC BEAM OF THE BEARINGLESS ROTOR OF AN ULTRALIGHT HELICOPTER**, Dalibor Petrović, Ivan Mudri, Vladimir Stanković

3. SECTION : WEAPON SYSTEMS AND COMBAT VEHICLES - WSCV

- 72 **EFFICIENCY ANALYSIS OF A FRAGMENTATION WARHEAD AGAINST SOFT TARGETS**, Omar Awad al Ameri, Edge Halcon, Predrag Elek
- 80 **SIMULATION MODEL OF TERRITORY CELL DEFENCE against HELICOPTER AS A HYBRID THREAT**, Radomir Janković, Momčilo Milinović
- 86 **PLANETARY GEAR PAIR DESIGN USING METAHEURISTIC ALGORITHMS**, Miloš Sedak, Maja Rosić
- 92 **APPLICATION OF DRONES WITH ARTIFICIAL INTELLIGENCE FOR MILITARY PURPOSES**, Aleksandar Petrovski, Marko Radovanović, Aner Behlić
- 101 **THE PROCEDURE FOR TESTING THE FUNCIONAL CHARACTERISTICS OF TANK GEARBOXES DEVELOPED ON THE BASIS OF T-72 TANKS**, Žarko Svilar, Obren Stojić, Željko Bulatović, Stojko Biočanin
- 107 **THE DESIGN OF TECHNICAL SOLUTION FOR THE FUEL LEVEL TRACKING IN MODERNIZED BVP M-80AB2**, Obren Stojić, Goran Jerkin
- 114 **FUZE VAF-M17 MICROCONTROLLER SOFTWARE**, Marko Živković, Dragan Domazet, Nikola Latinović
- 121 **FUZE VAF-M17 ELECTRONIC BLOCK TEST SOFTWARE**, Nemanja Deura, Dragan Domazet, Prof.Dr Srećko Nijemčević
- 128 **LOAD OF REMOTE CONTROLLED BATTLE STATION UPPER CARRIAGE WITH INTEGRATED AUTOMATIC GRENADE LAUNCHER**, Milan Ivković, Vladimir Milovanović, Bogdan Nedić, Stefan Djurić

4. SECTION : AMMUNITION AND ENERGETIC MATERIALS - AEM

- 134 **CLASSICAL AND INSTRUMENTAL METHODS FOR DETERMINATION OF RESIDUAL SOLVENT IN NITROCELLULOSE GUNPOWDER**, Magdalena Rakić, Mirjana Dimić, Bojana Fidanovski
- 138 **COMPARATIVE ANALYSIS FOR DETERMINATION OF STABILIZER CONTENT IN GUNPOWDER AND DOUBLE BASE PROPELLANT BY HPLC METHOD**, Mirjana Krstović, Magdalena Rakić, Ljiljana Jelisavac, Mirjana Dimić, Jelena Mojsilović, Bojana Fidanovski
- 144 **EXPERIMENTAL INVESTIGATION ON THE PERFORATION OF HIGH-HARDNESS STEEL PLATE BY AN API PROJECTILE**, Predrag Elek, Radovan Đurović, Nebojša Hristov, Damir Jerković, Aleksa Aničić
- 150 **DESIGN OF SUITABLE PYROTECHNIC DELAY COMPOSITION WITH WIDELY USED COMPONENTS**, Jelena Mojsilović, Jelena Petković-Cvetković, Dragica Kosrić, Jovica Nešić, Jela Ilić, Mirjana Krstović
- 155 **NUMERICAL ANALYSIS OF THE INHOMOGENEOUS OBSTACLE INFLUENCE ON THE PRECURSOR SHAPED CHARGE WARHEAD PERFORMANCE**, Miloš Marković, Predrag Elek, Dejan Jevtić, Radovan Đurović, Ivana Todić
- 161 **NUMERICAL ANALYSIS OF THE TUNGSTEN CARBIDE-COBALT CORED BULLET PENETRATING THE HIGN-HARDNESS STEEL PLATE**, Radovan Đurović, Predrag Elek, Miloš Marković, Dejan Jevtić, Mihailo Erčević
- 169 **INFLUENCE OF DIFFERENTLY CURED POLYMERIC BINDERS ON RHEOLOGY PROPERTIES OF PLASTIC EXPLOSIVES**, Danica Bajić, Ivan Dimitrijević, Slavica Terzić
- 176 **SYNTHESIS-THE CORE COMPONENT OF ENERGETIC MATERIALS RESEARCH**, Jasmin T. Lechner, Thomas M.Klapotke

- 181 **DETONATOR TESTING SOFTWARE**, Vladimir Drinčević, Dragan Domazet, Nikola Latinović
- 186 **INVESTIGATION ON THE DISTRIBUTION OF COMPONENTS IN RECYCLE DOUBLE BASED PROPELLANTS**, Iskra Piroeva, Stela Atanasova-Vladimirova, Feyzim Hodzhaoglu, Radi Ganev

5. SECTION : INTEGRATED SENSOR SYSTEMS AND ROBOTIC SYSTEMS - ISSRS

- 190 **SLIDING MODE CONTROLLER DESIGN FOR DC MOTOR DRIVEN ELECTROMECHANICAL FIN ACTUATOR**, Zlatko Petronijević, Pavle Adamović, Nebojša Jovičić, Aleksandar Stefanović, Miloš Pavić
- 195 **LEAD COMPENSATOR DESIGN FOR DC MOTOR DRIVEN ELECTROMECHANICAL FIN ACTUATOR**, Pavle Adamović, Zlatko Petronijević, Nebojša Jovičić, Aleksandar Stefanović, Miloš Pavić
- 201 **UAV ENGINE SPEED CONTROLLER FOR HOVER PERFORMANCE MEASUREMENT**, Lazar Petrović, Marija Samardžić, Uroš Ivković, Snežana Zurovac
- 205 **OPTIMIZATION OF THE ALGORITHM FOR ESTIMATING TIME OF ARRIVAL OF THE ACOUSTIC WAVE FRONT BY CHOOSING THE SIGNAL FILTERING METHOD**, Miodrag Vračar, Stevo Vračar
- 210 **CONTROL SYSTEM DESIGN AND INTEGRATION OF A BLOWDOWN WIND TUNNEL MODEL SUPPORT PITCH MECHANISM**, Biljana Ilić, Mirko Milosavljević, Stefan Krstić, Goran Ocokoljić, Dijana Damljanović
- 217 **MILITARY PROVING GROUND ELECTRO-OPTICAL SURVEILLANCE SYSTEM DESIGN**, Saša Vujić, Miloš Radisavljević, Branko Livada, Branko Tomić, Dragana Perić, Dragan Domazet
- 223 **APPLICATION OF INFRARED THERMOGRAPHY IN MONITORING OF PETROL ENGINE WITH AIR COOLING**, Ljubiša Tomić, Gordana Majstorović, Nenad Munić, Aleksandar Kovačević, Darko Vasiljević
- 227 **PERFORMANCE COMAPRISON OF METALLIC REFLECTOR AND PRINTED PLANAR ANTENNAS FOR MOBILE INFANTRY RADARS**, Boro Reljić, Zoran Golubičić, Igor Dotlić, Svetislav Marić, Marijan Herceg
- 232 **SIMPLE RADAR SYSTEM FOR DRONE SURVEILLANCE AND ACQUISITION**, Zoran Golubičić, Slobodan Simić, Svetislav Marić, Bojan Zrnić, Bogdan Pavković
- 237 **DESIGN, FABRICATION AND PERFORMANCE EVALUATION OF PASSIVE CORNER REFLECTOR FOR GROUND SURVEILLANCE RADAR TESTING**, Aleksa Zejak, Radule Zejak, Slobodan Simić, Boro Reljić, Igor Dotlić
- 242 **SIDE LOOKING DRONE RADAR FOR BURIED VEHICLES IN THE FORESTALL ENVIRONMENT**, Slobodan Simić, Zoran Golubičić, Aleksa Zejak, Boro Reljić, Eugen Šimara
- 246 **DEVELOPMENT OF THE DEVICE BASED ON THE DSPIC30F6014A MICROCONTROLLER FOR MEASUREMENT OF AXLE POSITION ANGLE**, Vladimir Lapčević
- 253 **ACTIVE DISTURBANCE REJECTION CONTROL OF UNMANNED TRACKED VEHICLE**, Goran Banjac, Momir Stanković, Stojadin Manojlović
- 260 **SOFTWARE FOR VIDEO STREAMS SYNCHRONIZATION IN LONG RANGE SURVEILLANCE SYSTEMS**, Aleksandar Simić, Tamara Parojčić, Miroslav Perić, Dragan Domazet

- 268 **DESIGN OF CONTROL SOFTWARE FOR EXTREME PERFORMANCE GYRO-STABILIZED PAN TILT POSITIONER FOR ELECTRO-OPTICAL SYSTEMS**, Miloš Radisavljević, Miloš Stanković, Đorđe Vulović, Dragan Domazet
- 275 **AUTONOMOUS ROBOT EXPLORATION IN GAZEBO SIMULATOR**, Novak Zagradjanin, Nikola Knežević, Kosta Jovanović, Bojana Pavković
- 281 **DESIGNING THE CONTROLLED GENERATOR OF A HOMOGENOUS MAGNETIC FIELD**, Radosav Surla, Nebojša Mitrović, Pavel Crnomarković
- 286 **A NEW INFRARED RADIATION DETECTION SYSTEM AS AN INSPIRATION FOR THE POTENTIAL CONSTRUCTION OF A RADIOMETRIC DETECTOR**, Marina Simić-Pavlović, Ljubiša Tomić, Branko Kolarić, Darko Vasiljević

6. SECTION : TELECOMMUNICATION AND INFORMATION SYSTEMS - TIS

- 290 **NOVEL APPROACH TO RECONFIGURATION POWER LOSS REDUCTION PROBLEM BY SIMULATED ANNEALING TECHNIQUE**, Branko Stojanović, Tomislav Rajić, Aleksandar Kovačević
- 296 **BIRD AND DRONES SPECTROGRAMS AND HOW TO DIFFER THEM**, Jovan Radivojević, Dejan Stanojević, Aleksandar Lebl
- 303 **SOFTWARE ALGORITHM FOR DRONE PRESENCE DECISION ON THE BASE OF RADAR SPECTROGRAMS**, Dejan Stanojević, Jovan Radivojević, Aleksandar Lebl
- 310 **ANALYSIS AND DESIGN OF HIGH GAIN FLAT PATCH ANTENNA**, Saša Gundelj, Aleksandar Stefanović, Saša Antonović, Igor Goršić
- 314 **DRONE CLASSIFICATION BASED ON RADIO FREQUENCY: TECHNIQUES, DATASETS, AND CHALLENGES**, Boban Sazdić-Jotić, Boban Bondžulić, Ivan Pokrajac, Jovan Bajčetić, Mohammed Mokhtari
- 321 **TDOA BASED APPROACH FOR ACCURATE TARGET LOCALIZATION BASED ON HYBRID GENETIC ALGORITHM**, Maja Rosić, Miloš Sedak, Mirjana Simić, Predrag Pejović
- 328 **GNS3 SIMULATION OF IS-IS PROTOCOL IN NETWORK COMPOSED OF JUNIPER ROPUTER**, Pavel Crnomarković, Radoslav Surla
- 333 **SIGNAL CENSTELLATION DISTORTION AND ITS IMPACT ON CUMULANT-BASED AMC PERFORMANCE**, Vladimir D. Orlić, Rade R. Božović
- 340 **DESIGNING THE PORTABLE BIOMETRIC STATION FOR MILITARY APPLICATION**, Dejan Čiprovski, Boško Božilović, Saša Božinović, Dragan Domazet
- 346 **INTERCEPT PROBABILITY ANALYSIS OF WIRELESS SENSOR NETWORKS WITH OPTIMAL SENSOR SCHEDULING**, Aleksandra S. Panajotović, Dejan N. Milić, Ivica B. Marjanović, Jelana A. Anastasov, Nikola M. Sekulović, Daniela M. Milović
- 351 **EVALUATION OF LORA WIRELESS TECHNOLOGY FOR MILITARY APPLICATIONS**, Uroš Pešović, Slađana Đurašević, Mihailo Knežević
- 356 **FLIGHT PLAN PREPARATION FOR POINT CLOUD DATA COLLECTION UTILIZING THE LASER SCANNER ALS80HP**, Dejan Đorđević, Ivan Potić, Zlatan Milonjić, Miloš Basarić, Saša Bakrač

7. SECTION : MATERIALS AND TECHNOLOGIES - MT

- 362 **SOLVING MILITARI-TECHNICAL PROBLEMS USING INVENTOLOGY**, Dušan Rajić
- 368 **CHARACTERIZATION AND HEAT TREATMENT OF ARMOUR STEEL OF NEW GENERATION**, Borut Kosec, Blaž Karpe, Aleš Nagode, Zijah Burzić, Igor Radosavjević, Gorazd Kosec

- 372 **DIMETHOATE AND OMETHOATE HYDROLYSIS IN AQUEOUS SOLUTIONS AND THE ASSESSMENT OF THEIR NEUROTOXIC EFFECTS**, Dragana D. Vasić Anićijević, Vladan J. Anićijević, Tamara Lazarević-Pašti
- 376 **WASTE-DERIVED CARBON MATERIAL FOR MALATHION ADSORPTION**, Vladan J. Anićijević, Katarina Kokanov, Tamara Tasić, Vedran Milanković, Tamara Lazarević-Pašti
- 380 **THE DESIGN AND SYNTHESIS OF THE THREE NOVEL DUAL REVERSIBLE INHIBITORS OF ACETYLCHOLINESTERASE BASED ON THE TACRINE AND AROYLACRYLIC ACID PHENYLAMIDE SUBSTRUCTURES**, Tamara Vujatović-Velimirov, Milan R. Nikolić, Maja Vitorović-Todorović
- 387 **HIGHLY EFFECTIVE NANOFIBERS WITH CATALYTIC CWA DEGRADATION ACTIVITY FOR CHEMICAL PROTECTION – CURRENT STATE-OF-THE ART**, Maja Vitorović-Todorović, Sonja Đ Bauk, Tamara Vujatović-Velimirov
- 392 **ASSESSMENT OF THE EFFECTIVENESS OF PERSONAL PROTECTION AGAINST THE EFFECTS OF RADIOLOGICAL CONTAMINANTS**, Sreten Ilić, Nataša Pajić, Željko Senić, Tatjana Golubović
- 398 **INFLUENCES OF ELECTROLYTE TYPE AND AGITATION REGIMES ON STRUCTURAL MECHANICAL PERFORMANCE OF ELECTROLYTICALLY DEPOSITED COPPER COATINGS ON DIFFERENT CATHODES**, Ivana Mladenović, Nebojša Nikolić, Jelena Lamovec, Dragan Tanasković, Miloš Vorkapić, Vesna Radojević, Dana Vasiljević-Radović
- 405 **FIRE-RESISTANT COMPOSITES BASED ON ACRYLIC-FUNCTIONALIZED LIGNIN AND POLYESTER RESIN OBTAINED FROM WASTE POLY(ETHYLENE TEREPHTHALATE)**, Nataša Knežević, Aleksandar Jovanović, Jovana Bošnjaković, Milena Milošević, Milica Rančić, Aleksandar Marinković, Jelena Gržetić
- 412 **SILVER COATED TEXTILES AS ELECTROCHEMICAL PSEUDOCAPACITIVE MATERIALS**, Stevan Stupar, Mihael Bučko, Dušan Mijin, Denis Dinić, Tanić Milan, Marina Knežević, Jelena Karanović
- 418 **INHIBITION OF ACID CORROSION OF MILD STEEL BY AQUEOUS EXTRACT OF OLIVE LEAVES**, Souad Touazi, Adjouati Bachir Abderaouf, Ziane Aymene, Nadia Zaidi, Mihael Bučko, Laid Makhoulfi
- 423 **AIR AND PRECIPITATION TESTING AS PART OF ENVIRONMENTAL RADIATION MONITORING IN THE VICINITY OF NUCLEAR FACILITIES**, Jovana Knežević, Nataša Lazarević, Sofija Forkapić, Kristina Bikit Šreder, Vesna Radumilo, Dalibor Arbutina
- 429 **DETERMINATION OF GAMMA PHOTON ATTENUATION COEFFICIENT OF LIGHTWEIGHT BUILDING AND INSULATION MATERIALS USED FOR OVERBUILDING IN SERBIA**, Milan Tanić, Denis Dinić, Stevan Stupar, Mirjana Čujić, Marko Anđelović
- 434 **MANUFACTURING OF FIBER –REINFORCED POLYMER COMPOSITE THERMAL INSULATION BY VACUUM TECHNIQUE**, Marica Bogosavljević, Jelena Grčetić, Slavko Mijatov, Saša Brzić, Tihovim Kovačević
- 439 **DEVELOPMENT OF POLYMER COMPOSITE LINER AS INSULATION MATERIAL: RHEOLOGICAL, MECHANICAL AND THERMAL PROPERTIES**, Slavko Mijatov, Saša Brzić, Tihomir Kovačević, Marica Bogosavljević, Jelena Gržetić, Mladen Timotijević
- 447 **DIGITAL THREAD FOR ADDITIVE MANUFACTURING**, Slobodan Malbašić, Srdjan Živković, Veljko Petrović, Aleksa Grubić

- 452 **IMPACT OF THE DIFFERENT ACTIVE FILLING HEIGHT OF THE FILTER ON THE SORPTIVE CHARACTERISTICS OF FILTERING**, Marina Ilić, Tatjana Marković, Biljana Mihajlović, Vukica Grković, Sonja Bauk
- 460 **INFLUENCE OF PRODUCTION PARAMETERS ON THE QUALITY OF SEMIFINISHED RIFLED PISTOL BARRELS**, Maja Mladenović, Nada Ilić, Jovana Mandić, Igor Radisavljević, Slobodan Ilić
- 465 **MECHANICAL CHARACTERISTICS OF ALUMINIUM SANDWICH PANELS WITH ALUMINIUM HONEYCOMB CORE**, Jelena Marinković, Igor Radisavljević, Srdja Perković
- 473 **PREPARATION AND CHARACTERIZATION OF HORSE SERUM BUTYRYLCHOLINESTERASE IMMOBILIZED ON PAPER-BASED CELLULOSE MATRIX**, Sonja Bauk, Maja Vitorović-Todorović, Marina Ilić, Tamara Vujatović, Tatjana Marković
- 479 **INFLUENCE OF DIFFERENTLY CURED POLYMERIC BINDERS ON RHEOLOGY PROPERTIES OF PLASTIC EXPLOSIVES**, Danica Bajić, Ivan Dimitrijević, Slavica Terzić
- 486 **USING SELF-ADHESIVE CONDUCTIVE TEXTILE AND COPPER TAPE ON TEXTILE**, Dušan Nešić, Dragan Tanasković, Miloš Vorkapić
- 491 **POLYESTER KNITWEAR IMPREGNATED WITH PVB/IF-WS₂ SYSTEM AS POTENTIAL CAMOUFLAGE MATERIAL**, Aleksandra Samolov, Danica Bajić, Katarina Mišković, Radoslav Sirovatka, Milan M. Stanojević, Dragan Knežević
- 495 **DEVELOPMENT AND PRODUCTION OF ULTRA-HIGH-STRENGTH STRUCTURAL STEEL S1100QL**, Jan Foder, Andrej Skumavc
- 501 **FRACTURE ANALYSIS OF VEHICLE-MOUNTED TELESCOPING COMMUNICATIONS MAST**, Nada Ilić, Ljubica Radović, Maja Mladenović, Jovana Mandić, Vesna Pejović
- 506 **APPLICATION OF IT TECHNOLOGY IN WASTEWATER TREATMENT**, Miljan Miletić, Marina Ilić, Tatjana Marković
- 514 **CHARACTERIZATION OF HETEROGENEOUS SENSING LAYERS IN GRAPHENE-BASED GAS SENSORS**, Stevan Andrić, Ivana Jokić, Miloš Frantlović, Katarina Radulović, Marko Spasenović
- 519 **POLYCHLOROPRENE BASED RUBBER COMPOSITIONS FOR GASKET PRODUCTION**, Marija Kluz, Jela Galović, Aleksandar Milojković, Ljiljana Jelisavac, Tanja Milošević
- 524 **THE INFLUENCE OF CHEMICAL COMPOSITION ON MECHANICAL PROPERTIES OF FLOW FORMED STEEL TUBES**, Igor Radovanović, Snežana Blagojević, Ljubica Radović, Dragomir Glišić
- 528 **EXPERIMENTAL INVESTIGATIONS OF THE INFLUENCE OF TEMPERATURE AND EXPLOITATION TIME ON THE FATIGUE CHARACTERISTICS OF X20 STEEL**, Dženana Gačo, Fadil Islamović, Srđa Perković, Miodrag Lisov, Radica Prokić-Cvetković
- 534 **THE INFLUENCE OF THE HEAT INPUT ON THE IMPACT ENERGY OF THERMALLY SIMULATED HSLA STEEL WELDMENTS**, Mersida Manjgo, Tomaž Vuherer, Srđa Perković, Miodrag Lisov, Zijah Burzić
- 541 **MIG WELDING PROCESS ON THE MECHANICAL PROPERTIES OF BUTT WELDED JOINTS OF DISSIMILAR ALUMINUM ALLOYS 2024-T351 /6082-T6**, Dragan Milčić, Tomaž Vuherer, Ljubica Radović, Miodrag Milčić, Maja Mladenović, Andreja Radovanović, Nenad Radović

- 548 **ANFIS FOR PREDICTING REMOVAL EFFICIENCY OF METHYLENE BLUE ONTO CORDIA MIXA-A**, Ahmed Khaleel Igrahim, Amir Alsammarrai, Salwa Hadi Ahmed
- 557 **ANFIS PREDICTION IN PLASMA ARC CUTTING**, Madina Isametova, Miloš Mlovančević, Dalibor Petković
- 567 **ANFIS PREDICTION IN PLASMA ARC CUTTING**, Madina Isametova, Miloš Mlovančević, Dalibor Petković

8. SECTION: QUALITY, STANDARDIZATION, METROLOGY, MAINTENANCE AND EXPLOITATION - QSMME

- 575 **SECURITY SYSTEM DESIGN USING A SOFTWARE SOLUTION**, Predrag Ranitović, Sanja Lončar
- 585 **RISK MANAGEMENT AT PUBLIC COMPANY „NUCLEAR FACILITIES OF SERBIA”**, Bojan Radoš, Nataša Lazarević, Jovana Knežević, Dalibor Arbutina
- 591 **DATA-DRIVEN RELIABILITY OF ELECTRONIC EQUIPMENT**, Slavko Pokorni
- 595 **IMPLEMENTATION OF Y-FACTOR METHOD FOR NOISE FIGURE MEASUREMENT USING EMI MEASURING RECEIVER**, Nenad Munić, Aleksandar M. Kovačević, Nenko Brkljač, Ljubiša Tomić, Miroslav Jovanović
- 600 **CONTROLLING INTERNAL AUDITING AT THE MINISTRY OF DEFENCE**, Igor Đorić, Mihajlo Ranisavljević, Marko Milojević

Abstract: *The application of conductive layers on textiles is considered. Tapes or foils of conductive textile and thin copper tape were used. The good and bad characteristics of textiles as a substrate and conductive tapes on textiles are considered, especially during use. The method of cutting conductive tapes and transferring them to textiles by means of a special self - adhesive tape is shown. An example made in the microwave technique, which is important due to high frequencies, is also presented.*

Keywords: *electronic textile, conductive textile, microwaves.*

1. INTRODUCTION

Electronic textile is increasingly used in modern electronics [1-10]. The field developed very quickly and acquired a large number of applications from ordinary life to special medical controls. This substrate also has its limitations, which are reflected in the variation of up to 10% of the values of parameters such as dielectric constant and thickness [6].

In addition to the substrate, the use of conductive textiles as metallization is very actual [8-13]. It lags behind pure metal in conductivity but also has advantages. The advantage over the pure metal layer is primarily in the flexibility and mechanical resistance coupled with the use of textiles [9-11]. Despite this, the use of self-adhesive metal tapes, especially copper but also aluminum, are very current. The biggest advantage over conductive textiles is conductivity, but also easier bonding, especially copper with soldering. Both self-adhesive conductive textile and copper tape give the possibility of easy removal of the conductive structure and installation of a new one without damaging the substrate.

An important application of self-adhesive conductive textile with conductive adhesive is the creation of a multilayer structure of the conductive layer that increases the conductivity [11] or electrically connects parts of the structure [12-14].

One of the problems is the transfer of the formed conductive structure to a given textile substrate, which is a general issue with other bases as well. Complicated sacrificial layers or etching and cutting on the textile base itself are used, which is often demanding due to a possible

defect on the substrate. There is also the problem of large areas, such as clothes, as well as curved surfaces where it is impossible to easily cut.

The application of electronic textiles in defense technology is also significant. It is at the forefront of new technologies in the application of textiles in defense [15-19]. Application for defense sector will hold nearly 45% of the conductive textile market by 2031 [17].

The example application is on microwave structures, like in [18,19] but can be also on lower frequencies. The microwave structure is taken as an example as the most demanding due to the high frequencies.

2. APPLICATION

Grid conductive cloth tape, *Xinst0402/12, Shenzhen Xinst Technology Co., Ltd*, total thickness (textile + conductive glue) 120 μm was used for conductive textiles with conductive adhesive. The conductivity of a given textile with a copper-nickel structure and polyester is about 10^5 S/m (copper bulk is $58 \cdot 10^6$ S/m, layer usually takes $18 \cdot 10^6$ S/m). A photograph of the surface and its photomicrograph is shown in Fig. 1. The disadvantage is the presence of plastic that makes it difficult to common soldering or bonding with silver epoxy paste.

The cutting was done by hand with a precision scalper given in [12]. In Fig. 2 are photographs from [12] of a cut structure on copper tape (copper 30 μm + non-conductive glue 30 μm) and of a cut structure on the given conductive textile. There is a tendency to wrinkle the copper tape while the conductive textile has remained flat.

a) Self-adhesive transparent tape (Scotch Removable) is glued to conductive textiles. Only supporting white paper carrying conductive textiles can be seen.

b) The supporting white paper was removed and the entire construction was glued to the substrate (felt). One can see the glued conductive textile and the self-adhesive transparent tape glued to it.

Figure 1. Photography and microscopic photography of conductive textiles (Motic 100x) [12].

Figure 2. Copper tape and conductive textiles cut with a precision scalper [12].

Using a special self-adhesive tape (*Scotch Removable*), as a sacrificial layer, the conductive structure is transferred to the textile. Fig. 3a, 3b and 3c show the procedures on the example with one strip of the sacrificial layer.

c) Removed self-adhesive transparent tape (below) as a sacrificial layer and only conductive textile remains on a felt substrate.

Figure 3. Using a special self-adhesive tape as a sacrificial layer

In Fig.4. photos from above and below of the filter with copper strip are given. You can see the use of short-circuited edges using conductive textiles with conductive glue. The use of short-circuiting at the edge is much closer to the definition of short-circuited branches than the usual conductive holes (via). Wrinkled copper surface can be seen.

In Fig. 5 is a photograph of the structures with conductive textiles from above using a short circuit at the edge. The application of conductive textiles with conductive adhesive can be seen here, similar to that in [11-14]. Even the author's work [12] was published before [14]. Fig. 6 presents SMA connectors details above and below. For better soldering next to the connector is copper, which is partly covered with the conductive textiles.

Figure 4. Structure with copper strip from above and below. You can see the use of short-circuited edges using conductive textiles with conductive glue.

Wrinkled copper surface can be seen.

Figure 5: Structure with conductive textiles from above.

One can see the use of shorting on the edge.

Figure 6: SMA connectors details above and below.

For better soldering next to the connector is copper, which is partly covered with the conductive textiles.

Both filters were made on a felt substrate with a thickness of about 0.85 mm, $\epsilon_r = 1.2$ and $tg(\delta)$ about 0.02. All microstrip lines are taken to be 50Ω . Since it was cut by hand, 3.5 mm was taken for the conductive textile and 4 mm for the copper strip. Stubs are 21.5 mm long. Simulation is in Program Package WIPL-D Microwave Pro v5.1 [20] for the metallized via holes. Models are in Fig. 7 for the conductive textile and in Fig. 8 for the copper tape. Corrections for the short-circuited edges (shorting on the edge) were done according to simulation and measurements. Simulated and measured S -parameters are given in Fig. 9. There are still needs for full wave EM-simulations.

It can be seen that conductive textiles have higher losses, which is logical. Without losses, the conductive textile would follow the copper tape filter.

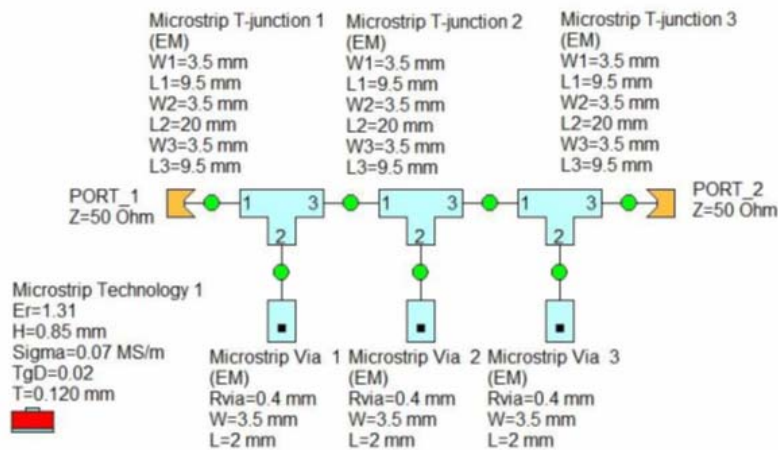

Figure 7: Simulation model with the conductive textile (including conductive adhesive in the metallization).

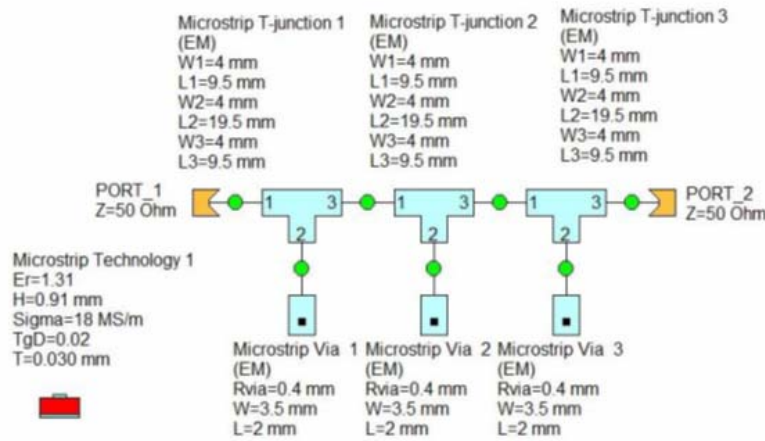

Figure 8: Simulation model with the copper tape (including nonconductive adhesive 2 x 0.030 mm).

Figure 9. Simulation and measured S-parameters: CT-conductive textile; Cu-copper tape.

5. CONCLUSION

The advantage of conductive textiles is the applicability of electronics to clothes and other textile materials, while making them functional for use.

The lack is a textile material as a substrate that does not have a precisely defined thickness and dielectric constant. Some problems can be with washing and friction. It is

also problem with connector bonding due to the nature of the material (difficult bonding of textile conductor and low resistance to high temperatures of textiles and glue).

The microwave structure is taken as an example as the most demanding due to the high frequencies. The branches are short-circuited with a conductive strip on the edge (short-circuited edge) and not with conductive via.

The advantages over other techniques such as applying conductive ink or paste and embroidery with conductive thread are:

- By applying a special self-adhesive tape as a sacrificial layer, it is possible to transfer the formed conductive structure in the form of a self-adhesive conductive layer to surfaces where etching or other invasive shaping methods are difficult to perform.
- The definition of thickness of the conductive layer is like in common electronic structures (better simulations).
- The self-adhesive conductive structure allows removing or even repairing the conductive layer and forming a new one without damaging the substrate.

ACKNOWLEDGEMENT

The authors thank to V. Milosevic (Institute of Physics, Belgrade) for help in measuring and I. Mladenovic in microscope photography.
